

Sheila Young, Ph.D., has published two research articles (1) on how "[Critical thinking activities in Florida undergraduate biology classes improves comprehension of climate change](#)" (*Journal of Biological Education*, January 2021) and (2) on "[Climate adaptation and risk preparedness in Florida's East Coast cities: views of municipal leaders](#)," (*Journal of Environmental Planning and Management*, October 2022). She also completed a [podcast on the same topic for Air University](#) on June 2022. Dr. Young is a retired USAID Foreign Service Officer who served as an Environment Officer in Honduras, an Economic Growth Officer in Azerbaijan, and a Senior Program Officer in Sri Lanka, Iraq, and Mozambique. Prior to the Foreign Service, she was an Energy Specialist with the U.S. Dept. of Energy's National Energy Technology Laboratory in Albany, Oregon; a Marketing Specialist with the U.S. Dept. of Agriculture in Washington, DC, and a Peace Corps Volunteer in Mauritania, West Africa.
